Overall Summary of Results

Total score: 74.0 out of 126 Pass mark: 75.0 Result: Failed

- Domain Grades
- Feedback Statements
- Individual Feedback

Domain grades

The graphs detail the number of times each grade was selected per marking domain over the 12 cases. Hovering over the column will reveal the number of times each grade was selected.

Feedback statements selected in your examination

For any failing domain, the examiners will have selected up to 4 relevant feedback statements. The feedback statements here correspond to the number of times each statement was chosen with those selected most frequently appearing first. Very occasionally a feedback statement will have also been provided for a domain where you passed. Find out further information on the feedback statements, their links to the relevant marking domains and developmental suggestions on the [RCGP SCA feedback statement web page](#).

- ×2

The management plan relating to referral was inappropriate or not reflective of current practice

▼
- ×2

The plan relating to the medical management of risk was inadequate or inappropriate

▼
- ×1
